

Professional Disinfectant Cleaner for Whipping Cream Machines

SANO-CREAM-CLEAN

Specially formulated with plant-based ingredients, this solution reliably removes grease and product residues while supporting hygienic disinfection through the flushing process.

Good Reasons to Choose SANO-CREAM-CLEAN

- Requires only 20 ml of cleaner per cleaning cycle
- One carton (4 bottles) lasts up to 26 weeks (6.5 months) with daily cleaning
- Rapid contact time of just 2 minutes
- Optimized for low temperatures, performing efficiently at approximately 50°C
- Effective across varying water hardness levels
- Precise, controlled dosing via a convenient dispensing bottle

Plant-Based Ingredients

- Formulated with plant-based ingredients
- Completely free from quaternary ammonium compounds (QACs/Quats)
- Specifically engineered to meet the demands of whipping cream machine flushing processes

Dose Economically. Clean Efficiently.

- Features a practical system for precise, controlled dispensing
- Economical cleaning made simple: just 20 ml per 1.5 liters of water.

Tested. Certified. Efficient.

- DIN 10507 certified
- Designed for rapid cleaning cycles
- Easy to use. Performance proven through product testing and practical application

Use biocidal products safely. Always read the label and product information before use.
